The Image tool allows you to add, move, and crop a photo from your computer and/or the web, as well as to retouch it. Photoshop provides the best control over the photo and its colors, without compromising on quality. You can also use the Image tool to manipulate layers in the Layers panel. The thumbnail of the photo (red circle) is locked, and you can

move it by dragging it. You can reposition it by clicking on the anchor points on its edges. You can control the resolution of the photo by pressing the up and down keys. Step 1: Click on the photo thumbnail to lock it. Then, with the image selected, press the alt key + the up and down keys to reduce or increase the resolution. Step 2: If you want, you can apply many transformations to the photo, such as the crop tool that will allow you to crop the photo to a certain area. Step 3: Select either the Crop or Crop All tool and move the edges of the crop in the image. When you want to crop it, just click the icon that represents the final crop. Now you can use the Ctrl / C keyboard shortcut or any other command to move the crop. Step 4: To remove the crop, press the alt + Delete keys. At this stage, the photo appears with a

Accession Accession is a canonical word and legal term in the canon law of the Catholic Church, referring to the perfection (consecration) of a religious person to the institute of a specific life (state), and it applies to ordination as well. The word stems from the Latin word *accessio*, which means "accession to a person or office". The first use of accession as an ecclesiastical term

dates to the 9th century. The Roman Canons (Canon 4) state that the first Pope receives the fullness of sacerdotium in the form of the martyrdom of the holy Apostles. In the Modern Roman Canon, accession is one of four ways of being received into the order: with full consent, "with special privilege and apostolic blessing", with special authorization, or as a cleric in holy orders. History In the Ancient Roman Canon of the 10th century, accession is listed among the five modes of reception, listing to the dean, who would ordain, the choice among these modes was not specified, though the dean would be assisted by two other clerics, a subdean and a lector. In the 11th century, accession is recorded as a distinct act of ordination, when a cleric receives the fullness of the priesthood in the form of the

martyrdom of the holy Apostles, this aspect of the office seems to have been a later development. The first known use of the word accession in the sense of the priestly ordination is found in the *Liber Pontificalis* of the 10th century, it is not used, however, in the context of the priestly ordination. In the 16th century, Laurentius Petri Bologna included the concept of accession to the priesthood within the ordination of bishops. The Eastern Catholic Churches have always considered that ordination a single act, at the Synaxis of Bishops, whereas the Churches of the West have always distinguished between the ordination of a bishop as a deacon and the ordination of a bishop as a priest, with the latter called *accessio* in Latin, but usually known in English as ordination. Modern usage In the present

Roman Canon, accession is one of four ways of being received into the order: with full consent, "with special privilege and apostolic blessing", with special authorization, or as a cleric in holy orders. See also Ordination
