Daphnella dubitata Daphnella dubitata is a species of sea snail, a marine gastropod mollusk in the family Raphitomidae. It was described by Maltzan in 1883. Description Distribution This marine species occurs off the Philippines. References Maltzan, H. von. "Neue Molluskenbauden von den Philippinen." Palaeontographica Abteilung A 12.1 (1883): 41-70 External links dubitata Category:Gastropods described in 1883Q: Text at the end of a gradient not appearing properly I have a problem with text appearing at the end of a gradient. I put a screenshot of how it looks in red (in the example it's the word 'this') I tried using background-image instead of background-color and still the same result. I tried setting background-position: right bottom; and background-position: right 4px bottom; - I've never had this problem before (the gap). I'm using Chrome (seems to be very common though) and the issue is on both of my computers. I'm really at a loss, it's driving me crazy. 3da54e8ca3
